Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Applicant's representative requested the After-Final interview to discuss the difference between the cited art Brimm et al. and the claim language specifically independent claims 1, and 8. The applicant's representative argued that Brimm et al. does not disclose "digital signature" as claimed in claim 8, to authenticate a single document to protect against un-authorized modification, while the Examiner maintains that the claimed language does not clearly state this step, instead, broadly interpreted Brimm et al. in column 9, lines 32-41. The applicant's representative discussed proposed amendment to the claim.

The Applicant's representative argued Brimm et al. does not disclose an electronic request automatically routed to a second user in order to fill part of the document. The Examiner responded by stating that no where in claim 1 is this claimed, the claim merely states "providing at least one request to a second user at a second location". No agreement was reached. The Applicant's representative indicated a response will be filed shortly.
